PROFESSIONAL SUMMARY

B.E. Robotics and Automation (Honours) graduate with a CGPA of 8.64/10 and hands-on experience in **Java**, Object-Oriented Programming, **MySQL**, and **React.js**. Comfortable across the full software development lifecycle: coding, testing, debugging, and deployment, with Agile practices. Completed a 3-month Web Developer internship involving production web development and deployment, plus a Java Development internship focused on Core Java and OOP. Quick learner, eager to write clean, scalable code.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python
- **Database:** MySQL
- **Web Technologies:** React.js, HTML5, CSS3, JavaScript
- **Backend Tools:** JDBC, Maven
- **Tools and Platforms:** Git, GitHub, IntelliJ IDEA, PyCharm, VS Code
- **Operating Systems:** Windows, Linux

EDUCATION

Dhaanish Ahmed Institute of Technology Nov 2022 – May 2026
B.E. Robotics and Automation (Honours) | CGPA: 8.64/10

C.S.I Gell Memorial Girls Higher Secondary School Jun 2019 – May 2022
Higher Secondary Education: 71% | Matric Secondary Education: 70%

EXPERIENCE

Web Developer Intern – Karthikesh Robotics Pvt Ltd | On-site — 3 Months

- Developed and deployed responsive, production-ready web pages using **HTML5, CSS3, and JavaScript**, improving cross-browser compatibility and overall user experience.
- Built and deployed two live websites, **Roboverz** and **Rookies Community**, taking them from development through to production hosting.
- Partnered closely with the development team to implement new features and resolve bugs, strengthening site reliability, code quality, and front-end component consistency.

Java Development Intern – Cognifyz | Remote — 3 Months

- Completed hands-on training in **Core Java**, **Object-Oriented Programming (OOP)**, and Exception Handling.
- Developed Java-based applications, gaining practical experience in debugging and problem-solving.

TECHNICAL PROJECTS

MDCreation – AI-Powered E-Commerce Website

Full-stack fashion e-commerce platform built with **Java** and **MySQL**, featuring an AI-powered shopping assistant for product discovery and customer support.

- Designed backend logic and **MySQL** schema for product browsing, cart, wishlist, and order management, supporting a catalog of 100+ products.
- Built an admin dashboard for inventory, order tracking, and sales analytics; integrated an AI-powered shopping assistant with role-based secure access.
- Extended the platform into a companion Android application, bringing core features to mobile users.

Degree of Freedom (DOF) Calculator

- Developed a GUI-based desktop application in **Python (Tkinter)** to calculate Degree of Freedom using the Gibbs Phase Rule, reducing manual calculation time.
- Designed an interactive interface with real-time input validation, improving calculation accuracy and overall user experience.

Student Attendance System

- Built a full-stack Student Attendance System using **Java** and **JDBC** on the backend with HTML, CSS, and JavaScript for the frontend.
- Designed a normalized **MySQL** schema with JDBC connectivity to record, update, and query attendance records, supporting automated report generation.
