PROFILE SUMMARY

Engineering graduate with Honours in Robotics and Automation Engineering and a CGPA of 8.5/10. Skilled in Java, Python, MySQL, HTML, and CSS with a strong foundation in OOP, DBMS, and SQL. Completed Java Development Internship and developed software projects using Java and Python. Possess strong problem-solving, analytical, and communication skills. Seeking an entry-level Software Developer role to contribute and grow in the IT industry.

EDUCATION

Dhaanish Ahmed Institute of Technology Bachelor of Engineering, Robotics and Automation(Honors) — Nov 2022 – Present, CGPA : 8.5/10

C.S.I Gell Memorial Girls Higher Secondary School l Higher Secondary Education | Matric Secondary Education — Jun 2019 – May 2022, 71%, 70%

TECHNICAL SKILLS AND INTEREST

- Programming Languages: Java, Python
- Web Technologies: HTML5, CSS3, JS
- Database: MySQL
- Core Concepts: Object-Oriented Programming (OOP), DBMS, SQL, Data Structures, Algorithms, Exception Handling
- Tools & Platforms: Git, GitHub, IntelliJ IDEA, PyCharm, VS Code
- Operating Systems: Windows, Linux (Basic)
- Areas of Interest: Software Development, Full Stack Development, Java Development, Python Development, Database Management

INTERNSHIP

Java Development Intern | (3 Months) | Remote

- Completed training in Core Java, Object-Oriented Programming (OOP), and Exception Handling.
- Developed Java-based applications and gained hands-on experience in debugging and problem-solving.

3D Printing & Arduino Development | (15 days) | Offline — Jul 2024 – Oct 2024

- Conducted mechanical testing on 3D-printed PLA samples with different infill patterns to evaluate and improve structural performance.
- Designed and fabricated prototypes using Arduino and 3D printing technologies, optimizing print parameters to enhance strength and reduce manufacturing defects.

PROJECTS

Event Management System — **Technologies**: Java, MySQL, HTML, CSS

- Developed a web-based Event Management System for managing event registrations, bookings, and scheduling.
- Implemented user authentication and database operations using MySQL to streamline event management.

Degree of Freedom (DOF) Calculator — **Technologies**: Python, Tkinter

- Developed a GUI-based application to calculate Degree of Freedom using Gibbs Phase Rule.
- Designed an interactive interface with input validation to improve accuracy and user experience.

CERTIFI CATIONS

- Java Programming Certification – Infosys Springboard
- Python Programming Certification
- Fusion 360 Certification
