PROFESSIONAL SUMMARY

Robotics and Automation (Honours) graduate with a CGPA of 8.64/10 and practical exposure to software and web development through internships and academic projects. Familiar with Java, Core Java, Object-Oriented Programming (OOP), Python, MySQL, React.js, HTML5, CSS3, JavaScript, JDBC, and Maven. Experience includes developing and deploying responsive web pages and live websites, building Java-based applications, and working through coding, testing, debugging, and deployment activities. Project work includes a Java and MySQL e-commerce platform with an AI-powered shopping assistant, a Python Tkinter Degree of Freedom calculator, and a Java/JDBC student attendance system. Knowledge of Git, GitHub, development IDEs, Windows, Linux, and Agile practices, with an interest in writing clean, maintainable software.

CORE COMPETENCIES

- Java Development
- Core Java
- Object-Oriented Programming
- Python Programming
- Web Development
- Responsive Web Pages
- HTML5 and CSS3
- JavaScript
- React.js
- MySQL Database
- JDBC Connectivity
- Maven
- Debugging and Testing
- Website Deployment
- Backend Logic
- Database Schema Design
- Cart and Order Management
- Inventory Dashboard
- Application Development
- Git and GitHub
- Agile Practices
- Problem-Solving
- Input Validation
- Windows and Linux

TECHNICAL SKILLS

- **Programming Languages:** Java, Python
- **Database:** MySQL
- **Web Technologies:** React.js, HTML5, CSS3, JavaScript
- **Backend Tools:** JDBC, Maven
- **Tools and Platforms:** Git, GitHub, IntelliJ IDEA, PyCharm, VS Code
- **Operating Systems:** Windows, Linux

PROFESSIONAL EXPERIENCE

Web Developer Intern – Karthikesh Robotics Pvt Ltd **3 Months**

On-site

- Developed responsive web pages using HTML5, CSS3, and JavaScript for production-facing websites.
- Built and deployed two live websites, Roboverz and Rookies Community, progressing the work from development to production hosting.
- Worked with the development team to implement website features and address bugs identified during development.
- Applied front-end development practices to support cross-browser compatibility, usability, and a consistent component experience.
- Contributed to code quality and website reliability through debugging, updates, and deployment-related work.
- Gained practical experience with web development workflows, including page implementation, testing, and production deployment.

Java Development Intern – Cognifyz **3 Months**

Remote

- Completed hands-on Java development training focused on Core Java fundamentals and Object-Oriented Programming (OOP).
- Developed Java-based applications as practical exercises to apply programming concepts.
- Applied exception-handling concepts in Java development exercises.
- Practised debugging and problem-solving while working through application development tasks.
- Strengthened understanding of Java program structure and the application of OOP principles.

TECHNICAL PROJECTS

MDCreation – AI-Powered E-Commerce Website

Full-stack fashion e-commerce platform built with Java and MySQL, featuring an AI-powered shopping assistant for product discovery and customer support.

- Designed backend logic and a MySQL schema for product browsing, cart, wishlist, and order-management functionality.
- Structured the product catalogue to support 100+ products.
- Built an admin dashboard for inventory management, order tracking, and sales analytics.
- Integrated an AI-powered shopping assistant for product discovery and customer support.
- Included role-based secure access as part of the platform functionality.
- Extended the platform into a companion Android application to make core features available to mobile users.

Degree of Freedom (DOF) Calculator

- Developed a Python desktop GUI using Tkinter to calculate Degree of Freedom based on the Gibbs Phase Rule.
- Created an interactive interface for entering calculation inputs and viewing results.
- Implemented real-time input validation to help improve the accuracy of user-provided inputs.
- Designed the application to reduce the need for manual Degree of Freedom calculations.
- Combined Python programming and GUI development in a focused calculation utility.

Student Attendance System

- Built a full-stack student attendance application using Java and JDBC for backend connectivity.
- Developed the frontend using HTML, CSS, and JavaScript.
- Designed a normalized MySQL schema for storing attendance information.
- Implemented database connectivity to record, update, and query attendance records.
- Supported automated report generation through the attendance system's data workflow.

EDUCATION

Dhaanish Ahmed Institute of Technology **Nov 2022 – May 2026**

B.E. Robotics and Automation (Honours) | CGPA: 8.64/10

C.S.I Gell Memorial Girls Higher Secondary School **Jun 2019 – May 2022**

Higher Secondary Education: 71% | Matric Secondary Education: 70%

CERTIFICATIONS

- Java Programming Certification – Infosys Springboard
- Python Programming Certification
- Spring Boot Certification – LinkedIn Learning
